EDUCATION

•Indian Institute of Technology Palakkad

2022–2026

Bachelor of Technology in Electrical Engineering with Minor in Data Science; GPA: 8.01

Kerala, India

•Little Angels School Sonipat

2007–2021

CBSE Class XII: 97.4%; Class X: 98.2%

Haryana, India

WORK EXPERIENCE

•Accenture

July 2026 – Present

AI Native Software Engineer

Gurgaon, Haryana

- Developing scalable backend services and data pipelines that automate enterprise workflows and generate actionable insights from large-scale datasets.
- Automating engineering and data workflows using cloud-native services to improve deployment efficiency, reliability, and engineering productivity.
- Collaborating with cross-functional Cloud, Data, and Engineering teams to design, build, debug, and maintain scalable production systems.

•Mercor

Jan 2026 – July 2026

Software Engineering Expert

San Francisco, USA (Remote)

- Contributed to production backend systems across large and complex Go and Python codebases, working within fast-paced engineering workflows.
- Implemented features and debugged issues across service boundaries while collaborating on maintainable production solutions.

•Accenture

May 2025 – July 2025

Advanced Application Engineering Intern

Mumbai, India

- Developed cloud-native services and REST APIs for scalable data processing and AI-powered enterprise applications.
- Contributed to machine learning initiatives spanning data preparation, model experimentation, and deployment.
- Designed and deployed AWS-based pipelines using SageMaker, S3, EC2, and Lambda, applying DevOps practices to automate data workflows.

•EasyAlgo

May 2024 – August 2024

AI/ML Intern

New Delhi, India

- Built statistical and machine learning models on financial time-series data to improve predictive accuracy and support data-driven investment decisions.
- Developed NLP-based sentiment analytics pipelines combining financial news and structured market data using Python and SQL.

LEADERSHIP & PROGRAM MANAGEMENT

•Placement Coordinator, Career Development Centre, IIT Palakkad

May 2025 – May 2026

- Coordinated placement-related activities across students, recruiters, and institute stakeholders, managing timelines, communication, and execution across multiple parallel processes.

•Assistant Fest Coordinator, Petrichor '24, IIT Palakkad

March 2023 - Feb 2024

- Coordinated a 200-member team across technical and non-technical competitions and events, driving planning, resource allocation, stakeholder coordination, and execution while overseeing a 26 lakh budget.

•Contingent Leader, Inter IIT Tech Meet 13.0 @ IIT Bombay

June 2024 – December 2024

- Led IIT Palakkad's technical contingent of 93 people across project planning, execution, coordination, and delivery for Inter IIT Tech Meet 13.0.
- Coordinated technical projects and managed approximately **8 lakh** in combined project and Tech Meet expenditure across planning and execution.

•Founder & President, Entrepreneurship Cell, IIT Palakkad

August 2024 – May 2025

- Led the student entrepreneurship organization, driving planning, execution, stakeholder coordination, and delivery of initiatives across the institute.

PROJECTS

•VartalApp

Full-Stack Collaborative Classroom Application; Project Manager

- Served as **Project Manager** for a software engineering course project, leading project planning, requirements organization, task allocation, milestone tracking, team coordination, and delivery.
- Applied software project management practices throughout development, coordinating technical work across the team and managing progress against planned milestones.
- Designed and built a cross-device collaborative classroom platform supporting screen sharing, video sharing, chat, collaborative canvas, AI assistance, cloud persistence, and file sharing using Java, Spring Boot, Swing, and SQLite.

•Splitzy Pay

[GitHub](#)

Full-Stack Financial Management Application

Feb 2026 – Apr 2026

- Built a financial analytics platform supporting expense forecasting, spending behavior analysis, and budget optimization using SQL and statistical analysis.
- Implemented UPI-style transfers, expense groups, category budgets, future expenses, and a unified financial ledger.

RESEARCH PUBLICATIONS

•Fight Scene Detection and Violence Highlight Generation System

- Designed a deep learning pipeline for large-scale video classification and temporal event detection, achieving **93.5% accuracy** while optimizing sequence modeling for long-form multimedia analytics.

•Adapting Interleaved Encoders with PPO for Language-Guided Reinforcement Learning in BabyAI

- Developed multimodal reinforcement learning models using PPO and transformer architectures, reducing reward variance by **42%** and accelerating convergence by **20%** through improved policy optimization.

•Explainable Detection of AI-Generated Images

- Proposed an explainable image authenticity detector combining a lightweight CNN and Qwen2-VL-7B for artifact localization, achieving **96.5% accuracy** with **175 ms inference latency** on 8-core CPUs.

TECHNICAL SKILLS

- Programming:** Python, SQL, Java, Scala, C++, MATLAB, Go
- AI & GenAI:** Machine Learning, Deep Learning, LLMs, RAG, Transformers, Computer Vision, PyTorch, TensorFlow
- Data Engineering & Backend:** PostgreSQL, MongoDB, Spark, Hadoop, REST APIs, Node.js, ReactJS
- Cloud & DevOps:** AWS, Azure DevOps, Docker, Kubernetes, CI/CD, Linux, Git
- Analytics:** Statistical Modeling, NLP, Time-Series Forecasting, Reinforcement Learning, Predictive Analytics

ACHIEVEMENTS

- Meta OpenEnv Hackathon 2026, Finalist
- Paytm GeekRoom Grand Prix 2026, Finalist
- Amazon ML Challenge 2025, Top 0.9% (251/27,600+)
- Flipkart GRiD 7.0, National Semi-Finalist
- Adobe AI Challenge 2024, 9th among all IITs
